it's all about the furniture

Trend, farver, stil, dos and dongs...

Møbelbranchen er præget af internationale strømninger og tendenser. Det er vi også hos Dencon. Men mest af alt handler vores kollektioner om møbler.

Moderne, flotte, fleksible og funktionelle kontormøbler.

For gennem mere end 50 år har kvalitetsmøbler til kontraktmarkedet været vores kerneforretning. Den knowhow er stadig Dencons solide håndværksmæssige fundament. Sammen med konkurrencedygtige priser. Men indsigt giver også rum til udsyn. Det betyder, at vi har lagt mange tanker i hvert eneste møbel. Rigtig mange. Fordi møblerne er en vigtig del af den moderne og velfungerende arbejdsplads.

Vores møbler er skabt i tæt samarbejde og udviklingsprocesser med nogle af Danmarks allerbedste møbelarkitekter. Deres faglige og æstetiske tilgang til form og produktdesign er kombineret med vores håndværksmæssige knowhow. Til kontormøbelserier, hvor - stort set - alt kan lade sig gøre.

På den måde forkæler vi hver enkelt kunde, hver individuel medarbejder - på arbejdsstationen, i mødelokalet, i kantinen, i konferencerummet, i receptionen og på chefens kontor.

Med lækre kontormøbler - som samtidig har indbygget god kvalitet, fleksible former, størrelser og indretningsmuligheder, funktionalitet, flotte farver og naturligvis ergonomi, som gør dem behagelige at arbejde i.

Alt det - fordi vi altid bare har lavet møbler. Og tænkt os om.

Derfor glæder vi os til at vise jer vores 2015 katalog - spækket med møbler, tanker og endnu engang en række spændende og innovative nyheder. God fornøjelse.

Trends, colours, style, dos and dongs...

The furniture industry is influenced by international currents and trends - as are we at Dencon. But above all, our collections are about furniture.

Modern, attractive, flexible and functional office furniture.

Quality furniture for the contract market has been our core business for more than half a century, making for extensive know-how. Everything we do at Dencon is founded on this know-how and our solid expertise when it comes to craftsmanship. That, and competitive prices. But our insight also provides space for vision. So a lot of thought goes into each and every piece of furniture we make. And we mean a lot! Because furniture is a vital part of the modern, efficient workplace.

Our furniture and development processes are created in close collaboration with some of Denmark's top furniture designers, combining their professional and aesthetic approach to form and product design with our know-how to produce office furniture ranges where (pretty much) anything is possible.

This way, we pamper every customer, each individual employee, be they at their workstation, in the meeting room, in the canteen, in the conference room, in reception or in the manager's office, with fabulous office furniture offering built-in quality, flexible shapes, sizes and design options, functionality, beautiful colours and, of course, ergonomics for comfort.

How do we do this? Well, making furniture is all we have ever done. All we have ever thought about.

We look forward to showing you our 2015 catalogue, packed with furniture, ideas and, true to form, a number of exciting and innovative new products.

Enjoy!

EXECUTIVE ROOMS

Moderne ledelse kræver moderne og gennemtænkte møbler. Chefen har brug for at kunne lukke døren - men indretningen af kontoret handler om at inkludere.

I dag adskiller chefens kontor sig ikke nødvendigvis markant. Men vi har givet rum til en række eksklusive særpræg: De bedste materialer - valnød, linoleum, krom. Muligheden for mange skrivebordsstørrelser. Eller den lave front på det fritstående bord, som skaber en behagelig diskretion på begge sider af skrivebordet.

Et fritstående bord stiller også krav til måden at skjule ledningerne - det har vi også tænkt på. Sammen med en række øvrige lækre detaljer.

Modern management demands modern, carefully considered furniture. Managers need to be able to close the door, and yet their office has to appear welcoming.

Today, the manager's office is not all that different to the rest, but we've made space for a number of exclusive features: the best materials - walnut, linoleum, chrome, a wide range of desk sizes, and the low front of the freestanding desk, which creates a comfortable sense of discretion on both sides of the desk.

Concealing cables can be an issue with freestanding desks - but we've got that one covered, too. Along with a number of other fabulous details.

DENCON

WORKSPACES

Individuelle celler, storrumskontorer, samarbejde i team. Indretningen af moderne arbejdsmiljøer handler om fleksibilitet. Så medarbejdernes daglige arbejde fungerer optimalt. Det stiller krav.

Ikke mindst til møblerne. Også på det felt har vi tænkt rigtig mange tanker. For at skabe møbler, der indretter sig efter arbejdspladsen - ikke omvendt.

Ergonomi - det ligger i rygraden på Dencon. Det giver overskud til også at tænke ud af boksen. For eksempel med nye nanooverflader, som forhindrer, at sol dagen lang giver genskær og irriterer. Eller bordplader som automatisk oplader mobilen. Og helt ned i detaljer som blandt andet de nye gæringssamlinger i opbevaringsmøblerne. En lækker designløsning - uden at vi går på kompromis med kvaliteten og til samme pris. Fordi vi kan - med dygtige og erfarne håndværkere i vores produktion i Skive.

Den stilrene elegance, som kendetegner vores design, understreger vi yderligere med eksempelvis nye spinkle greb til opbevaringsmøblerne, som nu også leveres med alle fronter i samme plan.

Og så kan Dencons møbler stadig tåle at blive brugt. Meget. Hver eneste arbejdsdag.

Individual cells, open offices, teamwork. The furnishing of modern working environments is all about flexibility, to ensure that employees can go about their day-to-day work in the best way possible.

And that's quite a tall order - especially when it comes to furniture. But we've given a lot of thought to this, too. To create furniture that adapts to the workplace - and not the other way around.

Ergonomics form the backbone of what we do at Dencon. This allows us to think out of the box. For example, with new nano surfaces, which prevent the irritating glare of the sun. Or desktops which automatically charge your mobile. Right down to the last details, such as the new mitre joints in our storage furniture. A great design solution - without compromising on quality - for the same price. Because we can, thanks to the skilled and experienced craftsmen working at our production unit in Skive.

The simple, stylish elegance that characterises our design is further accentuated by the delicate handles for storage furniture, which is now also available with flush fronts.

And Dencon furniture is designed to withstand use. Serious use. Day in, day out.

DENCON

THE ART OF EATING IN

Hos Dencon har vi også kogt kantine-møbelserien ind til lethed.

Designmæssigt ved at overføre vores elegante og enkle design til det brede program af kantine-møbler. Og i forhold til fleksibilitet ved at skabe klapborde, som let og hurtigt kan foldes sammen og gemmes væk. Når de står fremme, har vi gennemtænkt designet, så de i udtryk ikke adskiller sig fra de permanente borde i kantinen. En æstetisk flot løsning af behovet for fleksibilitet.

At flytte møbler slider på dem. Den risiko minimerer vi med nye støddabsorberende små ringe.

Og så rummer vores kantineprogram naturligvis også høje borde - fordi nogle helst står op og spiser. Samtidig giver de høje borde mulighed for rumdannelse i kantinen. En let, flot og fleksibel opskrift for fleste kunder.

At Dencon, our canteen furniture is made with ease in mind.

Design-wise, by transferring our elegant, simple design to a wide range of canteen furniture, and in terms of flexibility, by creating folding tables, which are easy to fold up and store away. When in use, they have been designed to look just like the permanent tables in the canteen. An aesthetic solution to the need for flexibility.

Moving furniture leads to wear and tear. We minimise the risk of this with new shock absorbing small rings.

Naturally, our canteen range also includes high tables, because some people like to stand up when they're eating. The high tables also double as room dividers in the canteen.

An easy, attractive and flexible recipe for most customers.

CONTEMPORARY CONFERENCE ROOMS

Kundemødet eller konferencen varierer i de fleste firmaer. I antallet af deltagere eller i formen.

De behov og krav tager vi højde for - ikke bare med et bredt sortiment af møbler, kvaliteter, størrelser og former. Vi har også koncentreret os om at udvikle konferenceborde, som tager højde for videoskærm på væggen og dialogformen under videokonferencer. For eksempel ved at tænke i kileformede konferenceborde, som giver mulighed for øjenkontakt - med mødedeltagerne på skærmen og rundt om bordet.

I det hele taget har vi tænkt fleksibilitet ind i konferencemøblerne. Så de nemt kan tilpasses behovet. Med bådfacon giver vi blandt andet så mange af deltagerne om bordet som muligt chancen for øjenkontakt - den vigtige forudsætning for den gode dialog.

Meetings with customers or conferences vary at most companies, in the number of those attending and in the form they take.

We take these needs and requirements into account - not just with the wide range of furniture, materials, sizes and shapes we offer, but also in the development of our conference tables, which take the video screen on the wall and the form of dialogue during video conferences into account. Wedge-shaped conference tables, for example, allow eye contact with those around the table and those on the screen.

Flexibility is very much an integral part of our conference furniture, making it easy to adapt to requirements. A boat-shaped table allows eye contact - the key to good dialogue - between as many people sitting around the table as possible

WELCOME

Receptionen er dine kunders første møde med dit firma. Velkomsten er derfor vigtig. Det kan gøres helt enkelt - med en modulopbygget skranke, hvor fleksibiliteten sidder på indersiden og giver forskellige former for funktionalitet til receptionisten.

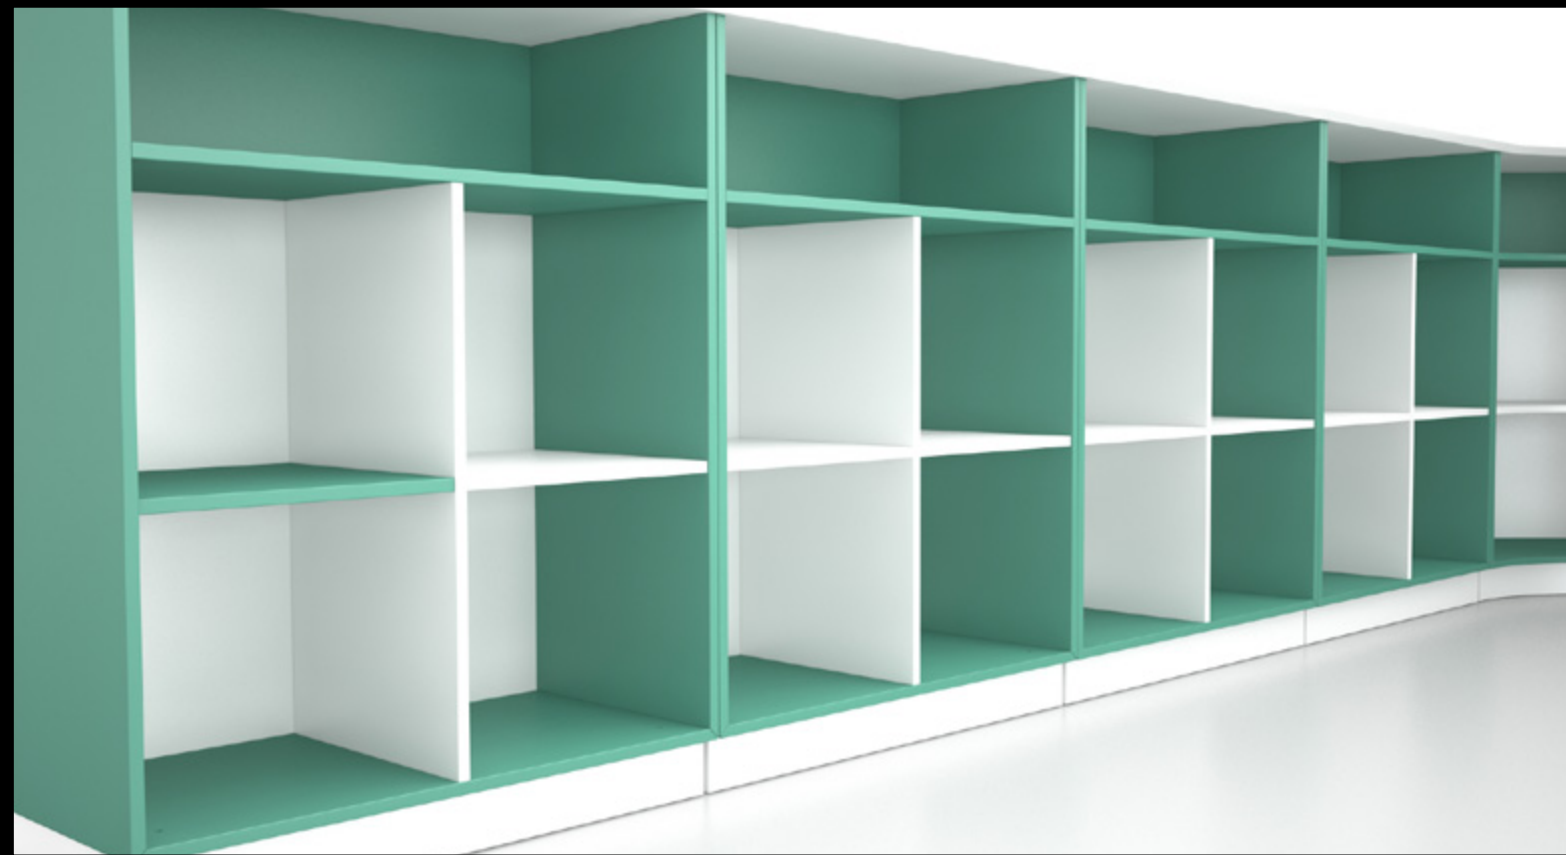

Eller en anelse mere avanceret - med Dencons nye modulløsninger, som giver mulighed for opbygninger med elegante afrundede hjørner. Så du kan indrette receptionen med præcis den formgivning, funktion og størrelse, som matcher behovet og rummet.

Udover funktionalitet og fleksibilitet har vi også tænkt i en række øvrige detaljer til receptionen. Alt sammen kvalitet gennemtænkt med fokus på pris: Velkommen indenfor i vores verden.

The reception area is your guests' first impression of your company. So the welcome they receive is important. Make it simple with a modular counter, where the flexibility is on the inside, providing the receptionist with various kinds of functionality, or slightly more advanced, with Dencon's new modular solutions, which allow for configurations with elegant rounded corners.

Then furnish your reception with precisely the design, function and size that match your needs and the space available.

But, functionality and flexibility are just two of our considerations. We also give a great deal of thought to a number of other details - all designed with quality and price in mind. Welcome inside our world.

TRUE COLOURS

Farver giver sjæl til en arbejdsplads. Eller identifikation. Og kan også fungere som lysterapi - skabe glæde og motivation.

Farver er et kundernes vigtige valg - det ved vi alt om. Derfor kan kunder og arkitekter vælge deres egne farver. Med mindre vi allerede ligger inde med den ønskede farve i vores brede standardpalette.

Test os bare - kun sjældent må vi give op på en farve. Fordi vi kan trække på den knowhow, vores lak- og sprøjtemaleafdelingen gemmer i bøtterne i produktionen. Som den slidstærke basis i vores farverige verden af møbler.

Colour puts soul into the workplace. Gives it an identity. It can also function in the same way as light therapy - generating a sense of joy and motivation.

Colours are an important choice for the customer, and we know all about that. So customers and architects are able to choose their own colours. Unless we already have the desired colour in our wide standard range.

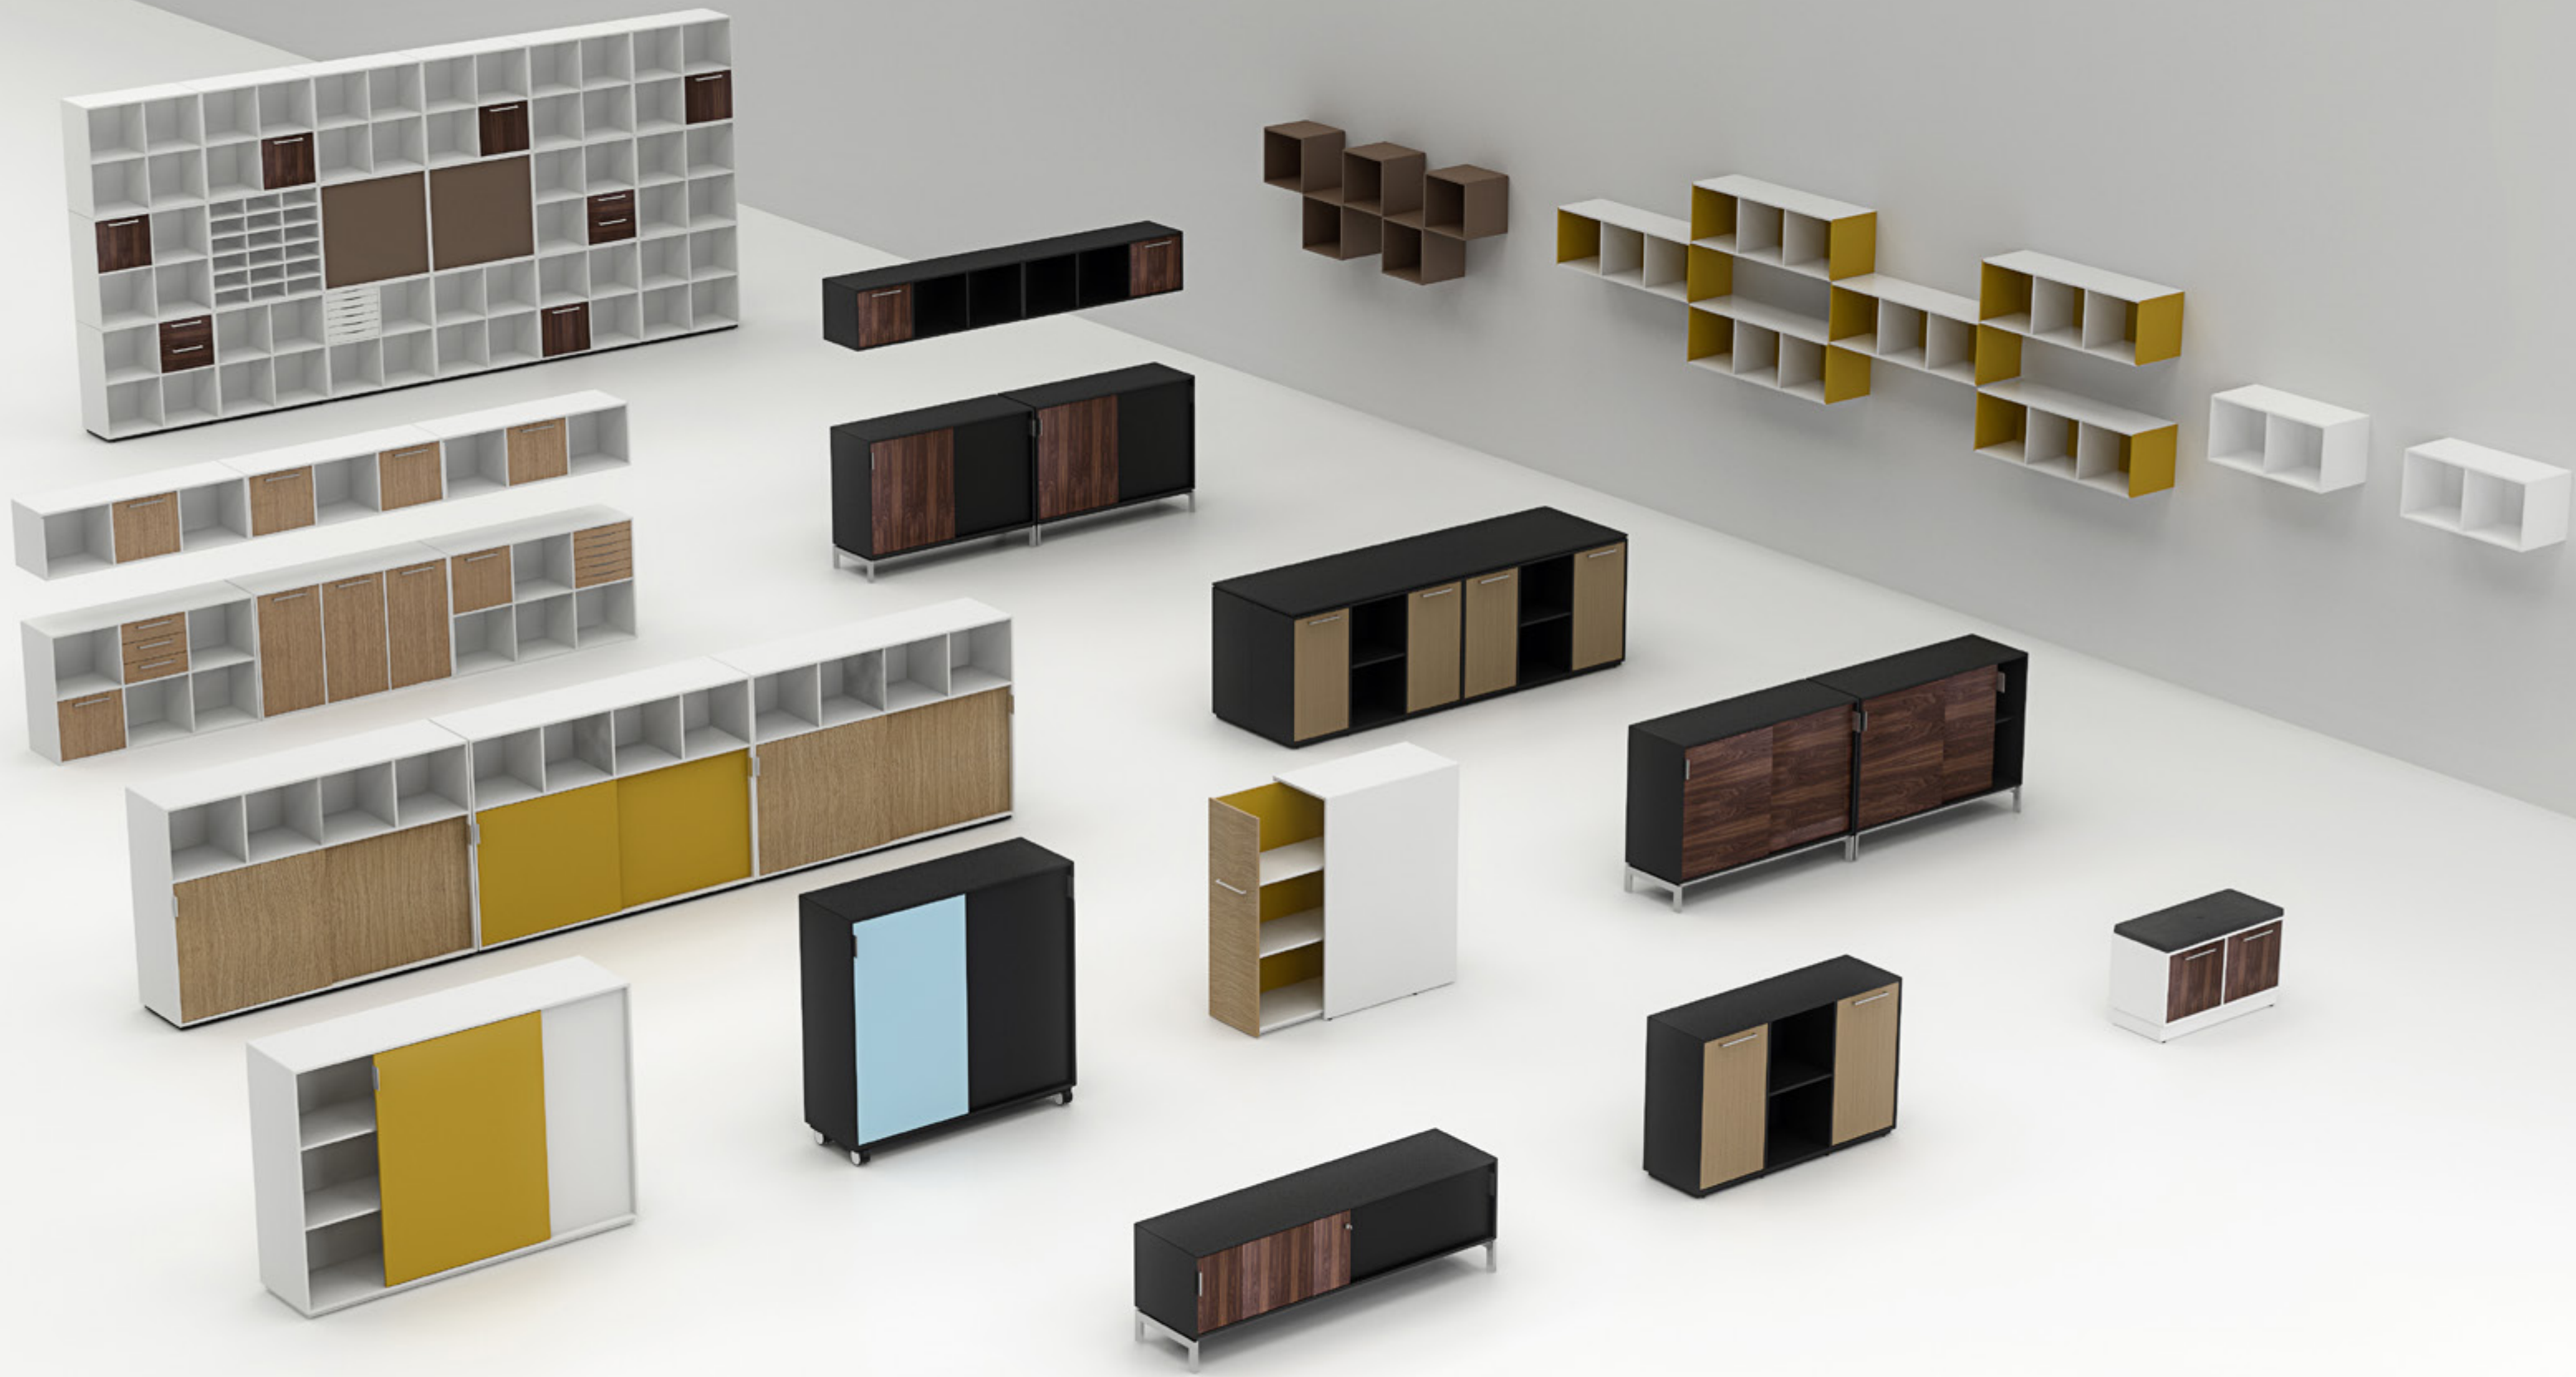

Try us! We have seldom been beaten by a colour, because we are able to draw on the expertise of our paint and spray paint department, stored away in the paint vats in production. A durable foundation in our colourful world of furniture.

GOOD GENES FURNITURE

Vi håber, du er blevet inspireret. Af vores design - og af vores måde at tænke møbler.

Delta blev oprindeligt udviklet for 12 år siden i samarbejde med møbelarkitekt MDD Michael H. Nielsen. Han har siden stået i spidsen for at videreudvikle, optimere, opdatere og forfine serien. Så Delta i dag stadig er moderne og ikke mindst populær. En tidløs møbelserie på en solid bund af gode møbel-gener.

We hope you've been inspired by our design and by our way of "thinking furniture".

Delta was originally developed 12 years ago in cooperation with furniture architect MDD Michael H. Nielsen. He has since overseen the development, optimisation, updating and refinement of the range, ensuring that Delta remains every bit as modern and popular today as it was back then. A timeless furniture range based on a solid foundation of good furniture genes.
